SAP, MS Project
User-centered design

Projects

Environmental Hazard Website
Developed an environmental hazard website from scratch with a team of seven students. Worked as full stack developer and back-end lead. Created vertical prototype with Django framework and MySQL Workbench on AWS Server. Documented project milestones.

Webcam Music
An app created in a 24-hour hackathon using Processing. Webcam is used to create music based on pictures taken.

Particle Life
Inspired by Conway's Game of Life, a javascript app utilizing particles to simulate organic movement.

Android Event Browser
Android app developed using Android Studio. Implements Meetup and Volley API. Able to search and display info retrieved from Meetup API in a card list.

ASCII Maze Solver
Receives an ASCII maze file and displays it correspondingly in graphics. A solution is then generated and a character sprite follows the path.

Data Wrangler Management Project
A real world I.T. project management case of a data wrangling software. Created the business case, project infrastructure, scope management plan, work breakdown structure, schedule, and budget.

Education

San Francisco State University
BS in Computer Science | Aug 2014 – Dec 2018
